

RENAULT SCENIC E-TECH

100% electric

April 2024

we changed everything but its name

Near 30-year success story of the Renault Scenic enters a new chapter with the next-generation all-electric version. With a range of up to 625 km⁽¹⁾, it reinvents its DNA with its innovative technologies, its solarbay^{®(2)} opacifying panoramic sunroof and its environmentally conscious approach by using recycled materials throughout⁽³⁾.

Technology and eco-responsibility combine to deliver innovative driving pleasure.

100% electric E-Tech engine up to 220 hp

up to 625 km WLTP of range⁽¹⁾

solarbay[®] opacifying panoramic sunroof⁽²⁾

openR link system with Google built-in⁽⁴⁾

up to 545 litres / 1,670 litres of boot volume⁽⁵⁾

up to 30 advanced driver assistance systems

(1) in WLTP cycle, actual range depends on driving conditions (type of road, driving style and weather conditions) Renault internal source / 2023. (2) depending on iconic version. (3) examples of recycled materials include the seat fabric, where depending on version up to 100% of the material is recycled. (4) Google, Android Auto™, Google Maps, Waze and other brands are registered trademarks of Google LLC. (5) with rear bench seat folded down.

06. customisation

we've reinvented the car for life and for living

Precision-modelled, the two-tone body features generous curves and sharp edges. Attention to detail, flush door handles and the use of recycled and bio-sourced materials make this an unprecedented SUV.

The front end features a new grille and a full LED light signature with half-round daytime running lights.

At the rear, chiselled lights, body creases and the Scenic monogram reinforce its distinctive style.

The esprit Alpine version stands out with its 20" speedway diamond cut alloy wheels, satin grey front and rear trim and matte shadow grey bodywork⁽¹⁾. Inside, the sporty seats feature blue top-stitching and the steering wheel has blue, white and red stitching.

(1) exclusive matte shadow grey paint as optional.

new interior space

Spread over two 12" screens, the 774 cm² openR gives the driver a high-performance, high-definition interface. Controls found on the steering wheel add ease of driving.

The structure of the dashboard is made from 80%⁽¹⁾ recycled material; up to 100% of the textiles used upholstery made from recycled materials⁽²⁾.

UK spec varies with a soft fabric dashboard

(1) depending on version. (2) the seat fabric varies by version: up to 100% recycled seat fabric on techno, up to 99% recycled seat fabric on esprit Alpine, up to 87% recycled seat fabric on iconic.

comfort for the whole family

Illuminated by the 1.65 m² solarbay[®](1) opacifying panoramic sunroof, the passenger compartment features ergonomic front heated seats. Thanks to the flat floor and 27.8 cm of legroom at the rear, there's plenty of space for everyone.

Solarbay[®] technology(1) is voice-activated with Google Assistant(2) or manually via a button located on the courtesy light. Adjustable to 4 different opacity configurations, it maintains light and heat comfort on board in both summer and winter. The system optimises the battery's autonomy by reducing air conditioning and heating consumption.

developed in partnership with Saint-Gobain, the Solarbay[®] opacifying panoramic glass roof is composed of nearly 50% recycled glass(3) from automotive glass production waste

The ingenious[®] folding 3.6-litre rear armrest is equipped with 2 USB-C ports. Several configurations are possible for inserting tablets or smartphones.

In total, more than 38 litres of storage space is distributed throughout the passenger compartment: on the console, seat backs and in the doors.

The boot volume adapts to your needs, offering a load capacity ranging from 545 litres to 1,670 litres with the rear bench seat folded down.

(1) available on iconic version. (2) My Renault, Google Maps and Google Assistant connected services are provided free of charge for 5 years from the date of delivery of your vehicle. Google, Google Maps, Google News, Waze and other brand names are all trademarks of Google LLC. (3) from the various stages of automotive window production at the Saint-Gobain Sekurit plants. (4) image shown has a false floor fitted which is an accessory.

up to 625 km of range⁽¹⁾

The result of innovative research and development, Renault Scenic E-Tech 100% electric pushes the boundaries of performance and efficiency with its weight distribution, optimised energy management and aerodynamic design.

Its platform houses an 87 kWh battery and an efficient 160 kW electric motor for a WLTP range of up to 625 km⁽¹⁾.

aerodynamic design

The lines of the 100% electric Renault Scenic E-Tech have been designed to maximise its range: a low, compact car, a front grille with optimised air intake, sculpted rear flanks, flush handles and aerodynamic aluminium wheels.

heat pump and heat management

Renault Scenic E-Tech 100% electric comes with a heat pump as standard, combined with a thermal management system for the battery and engine. This automatically regulates battery and engine temperature, and ensures the thermal comfort of the passenger compartment whatever the weather.

optimum weight

Thanks to the use of recycled aluminium, the vehicle is one of the lightest in its category at 1.914 kg⁽²⁾.

regenerative braking

Depending on the type of road over which the vehicle is travelling, the driver can choose from four levels of regenerative braking via the two paddles located behind the steering wheel. This way, every time the vehicle brakes, energy is recovered and its overall range is improved.

driving range⁽¹⁾

up to 625 km of range

(1) long range versions in WLTP cycle and trim dependant, actual range depends on driving conditions (type of road, driving style and weather conditions) Renault internal source /2023. (2) weight of a techno long range version.

charging made easy

At home, at work or on the move, Renault Scenic E-Tech 100% electric offers you a charging versatility that is unique on the market.

charging at home, at work or elsewhere

up to 22kW AC charge⁽¹⁾

Charge Renault Scenic E-Tech 100% electric easily thanks to its fantastic AC charging capability of up to 22kW, which is relatively unique across the market and charges the battery to 50% in just over 2 hours⁽²⁾.

My Renault application

Manage your range at any time, start charging remotely or schedule it at off-peak times.

motorway charging

up to 150kW DC fast charge

For longer journeys, recover range more quickly with up to 150kW DC fast charge⁽³⁾.

(1) standard across all versions. (2) using 22AC kW recover 50% battery in 2 hours / 100% battery in 5 hours. (3) on long range versions.

Renault Scenic E-Tech 100% electric comes with a mode 3-type⁽¹⁾ cable for use with a home or public charging point.

batteries, a controlled life cycle

As the first carmaker to take action across the entire life cycle of batteries, Renault Group has developed solid expertise in increasing their durability and extending their uses.

The various stages in the life of the Renault Scenic E-Tech 100% electric battery are part of the Refactory project in Flins and Seville, the first plants dedicated to the circular economy.

After use, the battery⁽¹⁾ can have a second life before being recycled.

100%

initial life

During its initial life, the battery powers Renault Scenic E-Tech's 100% electric engine and delivers electric traction. The battery is designed to last the entire life of the vehicle.

< 70%

second life

When a vehicle reaches the end of its life, the battery often still contains 60% to 70% of its original storage capacity. It can then be reconditioned or reused for storing energy produced by wind turbines and solar fields, for example. This second life can last from 6 to 10 years.

< 10%

recycling

At the end of its life, the battery begins its recycling phase by being disassembled and the structural elements extracted: plastic, metals and cables are sent separately to their respective recycling facilities, and the modules are processed in facilities dedicated to Li-ion batteries.

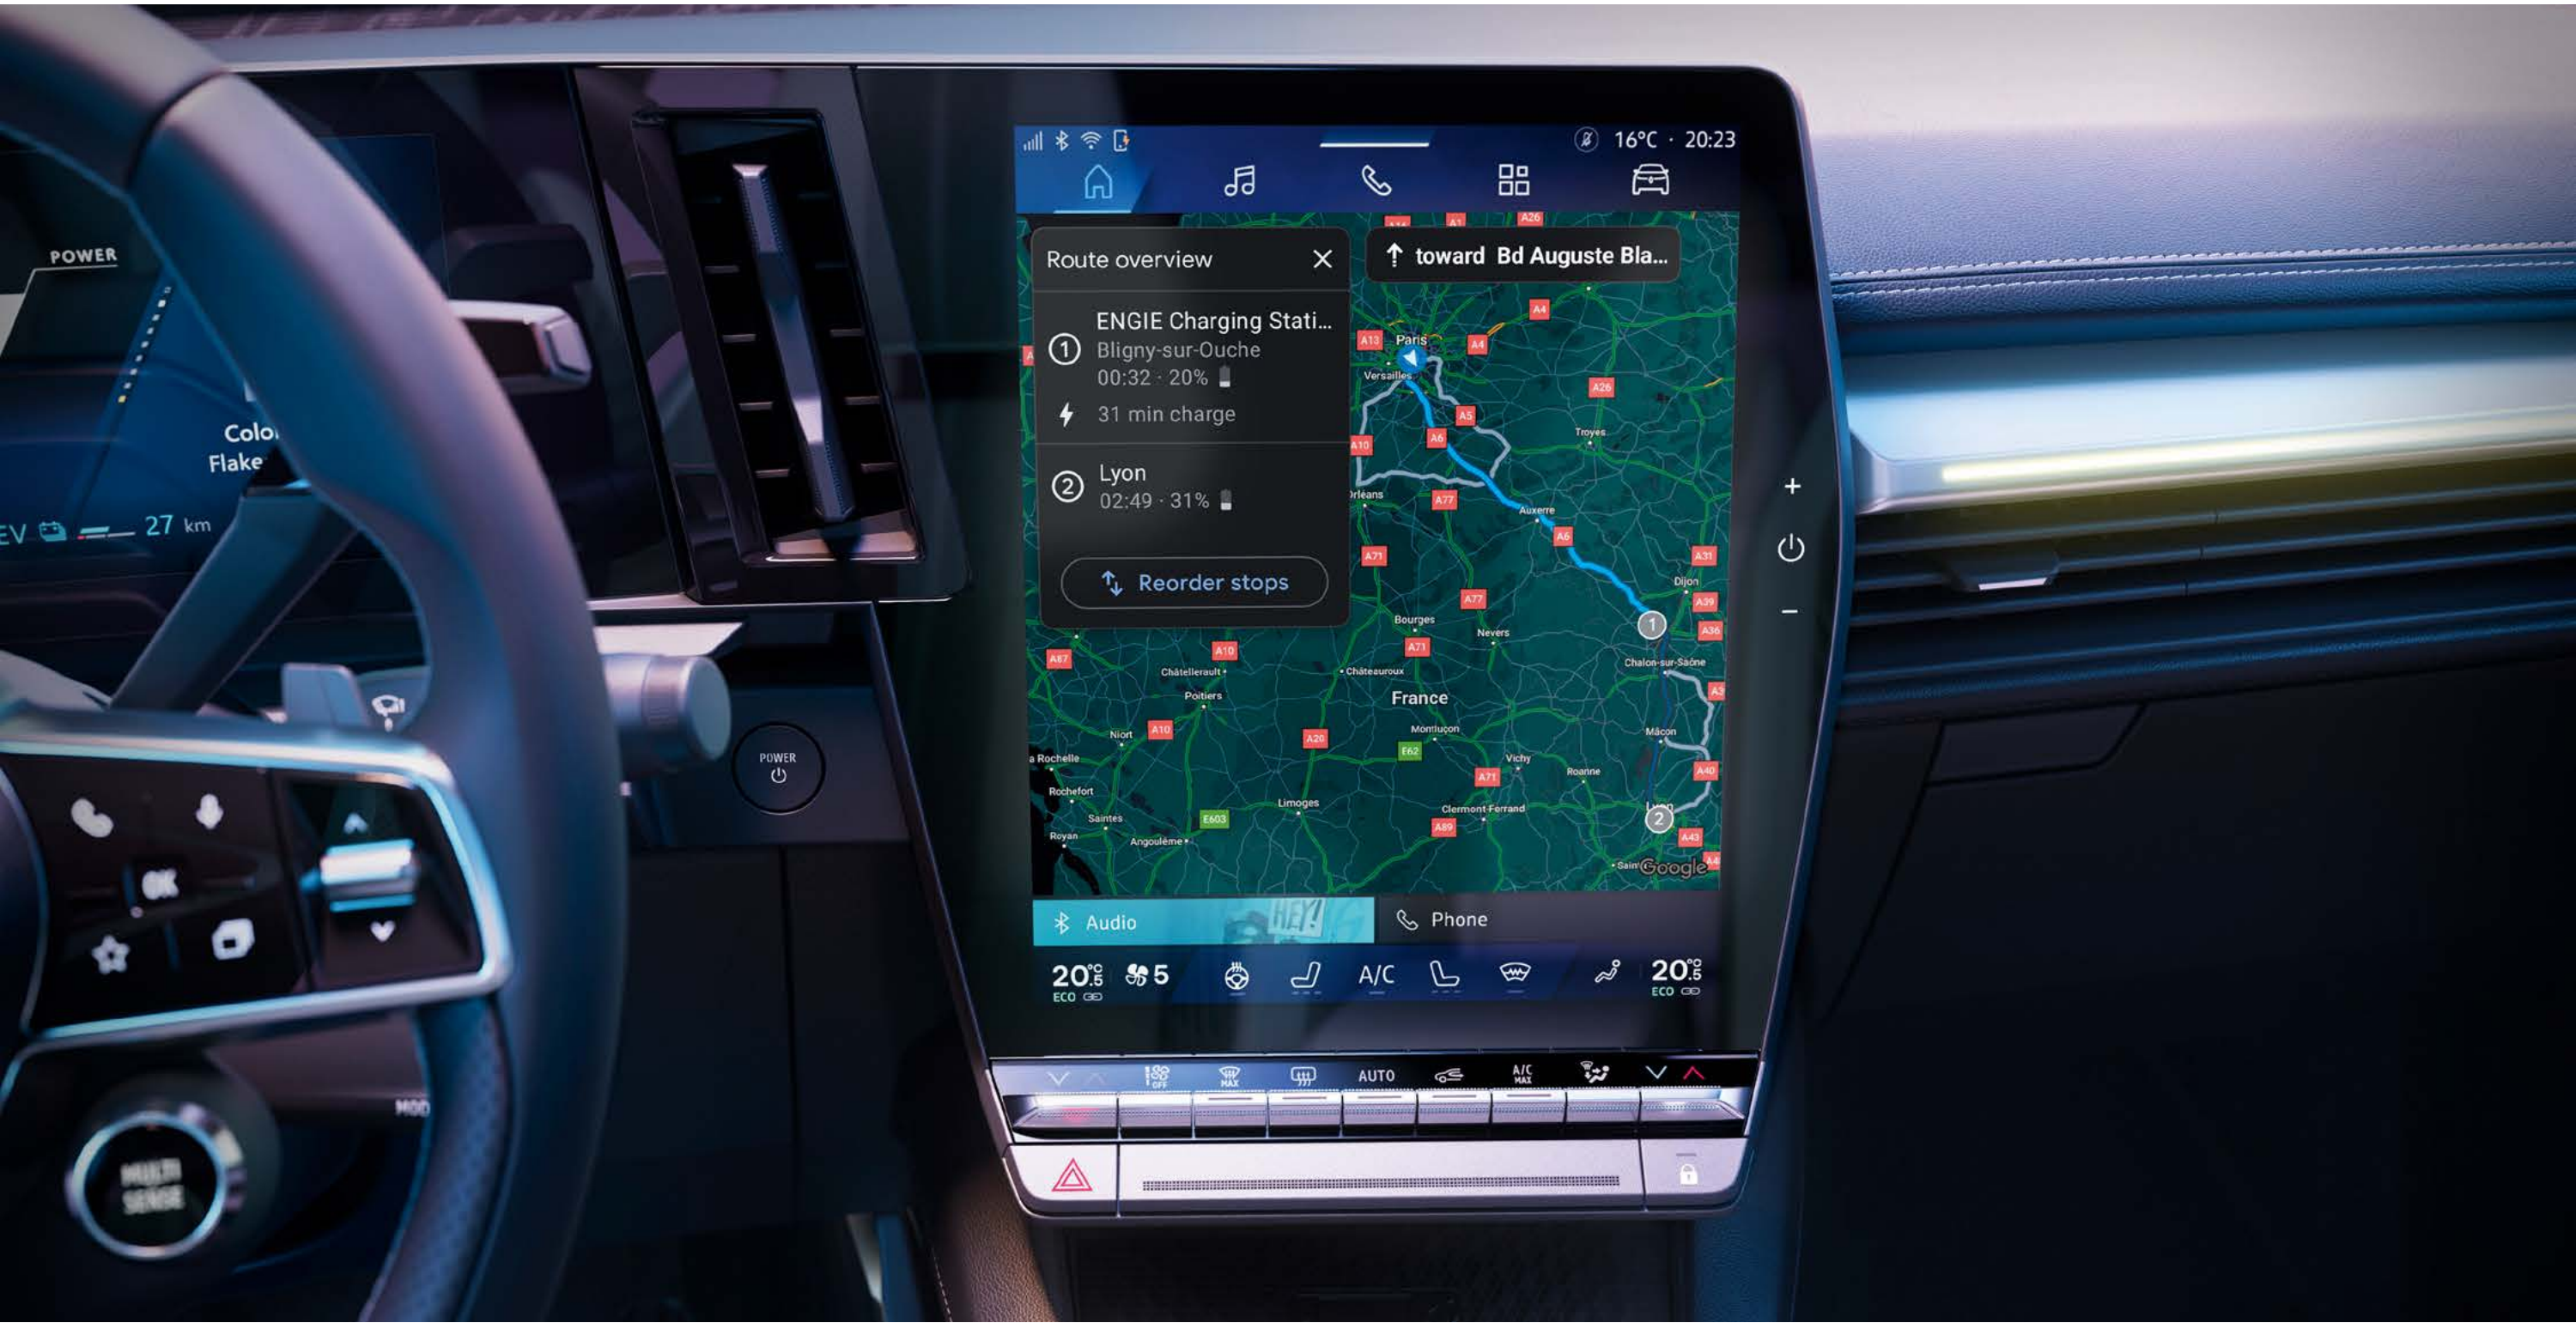

(1) the Renault Scenic E-Tech 100% electric battery and all the batteries used for powering an electric car.

openR link system with Google built-in⁽²⁾

The new-generation 774 cm² openR interface provides access to openR link multimedia system connected services with built-in Google⁽²⁾. More than 50 applications are available⁽¹⁾, including 11 from Renault partners with Google Play⁽³⁾.

Simplify your electric journey with Google Maps⁽²⁾ and use a journey planner updated in real time.

electric journey planner

On the road, the system suggests itineraries based on available charging points and your battery life. If there is an obstruction on the road, the route is automatically recalculated and offers other charging points according to the new route.

Points terminal

Route planning/optimisation with charging points in real time.

charging point

Information on the availability and power of charging points.

charge optimisation

Presetting of the battery temperature for faster charging.

Voice control: "Hey Google, tell me which charging points are nearby!" Plan your journeys, set the temperature, change your driving mode - the voice assistant⁽²⁾ is there to help.

Over 50 applications⁽¹⁾ with exclusive content are available via Google Play⁽³⁾, including Waze, SongPop for Renault, and Amazon Music.

Waze is a community-based navigation app that shares information in real time. Waze boosts your peace of mind.

Drive to the beat with our new musical game – SongPop for Renault. Play together and rediscover popular songs with your family and friends!

Take to the road while listening to playlists, and much more, with Amazon Music, included with your Amazon Prime subscription.

Access all your favourite radio stations live, at any time, in the UK or abroad, with Radioplayer.

Vivaldi browser is an efficient, fast Web browser that respects your privacy, but also gives you the chance to watch things such as YouTube, Netflix or Disney+ through your normal accounts. Keep yourself, or the kids, entertained while you're charging!

With EasyPark, you can plan and book millions of parking spaces across Europe. Enter your destination's address or navigate using the map.

If Spotify is more your bag, download the app to listen to your favourite music or podcasts.

(1) depending on country. (2) My Renault, Google Maps and Google Assistant connected services are provided free of charge for 5 years from the date of delivery of your vehicle. (3) the use of applications downloaded from Google Play requires a dedicated data package. To use these apps, share your phone's connection with your Renault. Google, Google Maps, Google News, Waze and other brand names are all trademarks of Google LLC.

audio signatures

Featuring cocoon-effect technology developed by Renault, the passenger compartment is perfectly soundproofed so you can enjoy its Harman Kardon® high-fidelity sound⁽¹⁾. Five listening modes have been designed to optimise sound reproduction, depending on the source chosen.

9 loudspeakers for a total power output of 410 W: 2 tweeters on the sides of the dashboard, 4 woofers in the front and rear door panels, 2 tweeters and 1 subwoofer in the boot

A musical sequence composed by Jean-Michel Jarre welcomes drivers and passengers on board, together with a visual animation on the dashboard. Outside, a special sound warns pedestrians that the vehicle is travelling at less than 29 kph.

(1) Harman Kardon available on iconic version.

detect, inform, guide

The "safety score" assesses your ability to drive safely by analysing information about speed, trajectory and safety distance as you drive. At the end of each trip, it displays your score from 0 to 100 to help you improve your driving.

The "safety coach" helps you to improve your driving by using the safety score and informs you in real time of the potential risks on your route, based on the surrounding data.

05. safety

up to 30 advanced driver assistance systems

As part of the human first programme, Renault Scenic E-Tech 100% electric features up to 30 advanced driver assistance systems⁽¹⁾

active driver assist

This system regulates your speed by taking the road environment into account, maintains safe distances and ensures you remain in lane. When traffic slows down, the vehicle stops and restarts automatically.

360° around view 3D camera

The 4 cameras, whose images recreate the vehicle's direct environment 360° around it, allow you to carry out your manoeuvres effortlessly.

rear detection with emergency trajectory correction

When the vehicle changes lanes, the system warns you of a potential collision with an overtaking vehicle in the adjacent lane. If a collision is likely, it performs an automatic emergency trajectory correction.

hands-free parking

This system makes it easier to park. Your vehicle can take care of finding a parking space and providing directions. The only thing you need to manage is your speed.

occupant safe exit alert

This system alerts you if a vehicle is approaching from the rear when you want to open the door.

rear view camera

A camera positioned at the rear of the roof is combined with a rear-view camera system. The interior rear-view mirror provides an unobstructed view, even with tall passengers in the rear.

driving assistance systems

- active driver assist
- hill start assist
- distance warning
- automatic main-beam / dipped headlight activation
- adaptive vision LED headlights (with integrated fog light function)
- speed limiter
- cruise control

accessories

tool-free removable towbar and tilting bike rack

Carry up to 3 bikes on the 13-pin towbar. Foldable and tiltable, the bike carrier gives you easy access to the boot. Thanks to its tow ball that can be easily removed without tools, the aesthetic appeal of your vehicle is preserved.

double floor with storage space

It has 3 storage bins, ideal for your electric vehicle. Your charging cables and other items are within easy reach. Achieve a completely flat floor by folding down the rear seats.

high-comfort cushions on rear headrests

Combining design, support and comfort, they help create a truly premium driver experience.

multifunction organiser on front seat

It features several storage compartments of different sizes for all your travel essentials.

car seat covers

Put an end to footprints on the front seats and rear bench with this elegant solution.

esprit Alpine textile mats

Add extra sporty character to your vehicle by displaying the Esprit Alpine finish. Made-to-measure and personalised, they can be attached quickly using the safety clips provided.

the human first program is a comprehensive safety program developed by Renault in collaboration with researchers, experts and firefighters.

because road safety concerns all road users, whether they are pedestrians, cyclists, motorists, the human first program by Renault undertakes to:

1. preventing accidents by developing safety equipment and advanced driver-assistance and safety systems

up to 30 advanced driver-assistance systems/
more than 60 safety features, up to 7 airbags,
child seats (Isofix), Renault Fixe4sure solution/
more than 2,000 safety-related patents filed since 1970

2. dealing with accidents based on innovations developed with the fire service

QRescue / Fireman Access / more than 5,000 firefighters
trained over 10 years in 19 countries worldwide / around 400 cars
donated per year for their training

3. reducing the number and severity of accidents by investing massively in R&D

safety score / safety coach / connected services / big data /
artificial intelligence and cybersecurity systems

glossary

E-Tech

100% electric, hybrid or plug-in hybrid technology developed by Renault.

regenerative braking

A braking energy recovery system that extends the vehicle's range: each time the vehicle slows down, part of its kinetic energy is converted into electricity. The battery is recharged when the driver lifts their foot off the accelerator pedal or lightly depresses the brake pedal.

home charging point

Delivers a much higher current than a conventional household socket, for faster, more efficient charging. With its charge control and overvoltage protection devices, it makes home charging safer.

flexi-charger

Recharging cable used to connect a car to a domestic electrical socket. Designed for occasional home recharging, the flexi-charger is best connected to an electrical socket with a specific earth connection.

mode 2

For domestic use, this cable is needed to recharge the electric vehicle using domestic (3-pin) sockets.

mode 3

This cable is needed to recharge the electric vehicle using the wallbox or public infrastructure.

useful capacity

Amount of energy contained in the battery that can be used by the vehicle. Value expressed in kilowatt hours (kWh).

kWh

Abbreviation for kilowatt hours. Unit of energy which corresponds to 1 kW of power consumed over one hour.

kW

Abbreviation for kilowatt. Unit used to measure the power of a vehicle's engine, whether electric or internal combustion. The load power in direct current (DC) or alternating current (AC) is measured in kilowatts.

AC charge

Alternating current charging at low or medium power (22 kW maximum). Charging method most commonly used at home or at most public charging points.

DC charge

Rapid direct current charging (50kW minimum). Requires a specific fast charging station, available only on the public network.

My Renault

Renault application connected to your vehicle and downloadable from your phone on Google Play or App Store. It allows you to locate nearby charging points, geolocate your vehicle, programme charging and prepare for your departure in advance by displaying the remaining range and presetting the passenger compartment temperature.

heat pump

Equipment used to heat the passenger compartment of your electric car. The heat pump significantly reduces your electricity consumption and maximises your driving range from an outside temperature of less than 15°C.

kWh/100 km

Unit of measurement for the average energy consumption of an electric or rechargeable hybrid car over 100 kilometres. This is the equivalent of "litres per 100 km" for electrified vehicles.

WLTP

Worldwide harmonised Light vehicles Test Procedure. This protocol defines the exact conditions under which vehicle tests are carried out, irrespective of the manufacturer, making it possible to share and compare information that is important to consumers and legislators, such as fuel or electricity consumption, the range of electric or rechargeable hybrid vehicles, and pollutant emissions that are much closer to everyday use.

Every precaution was taken to ensure that this brochure was accurate and up-to-date when published. This document has been created using pre-production and prototype models. In line with its policy of continuous product improvement, Renault reserves the right to modify the specifications, vehicles and accessories described and featured at any time. Any such modifications are communicated to Renault dealers as quickly as possible. Depending on the country of sale, certain versions may differ and certain equipment may be unavailable (as standard, as an option or as an accessory). Please contact your nearest dealer for the latest information. For technical printing reasons, the colours featured in this document may differ slightly from those of the actual paintwork or interior trim. All rights reserved. Reproduction in any format and by any means of all or part of this brochure is prohibited without prior written authorisation from Renault.
